Subject: Comments regarding Davis Hydro's "The Kilarc Reconstruction Alternative: A Fish Restoration Proposal for the Kilarc Hydropower Facility" dated June 20, 2008, FERC P-606.

Dear Secretary Bose:

NOAA's National Marine Fisheries Service (NMFS) has received Davis Hydro's "The Kilarc Reconstruction Alternative: A Fish Restoration Proposal for the Kilarc Hydropower Facility" dated June 20, 2008. The document was filed with FERC on July 7, 2008. We have reviewed the document and offer the following comments.

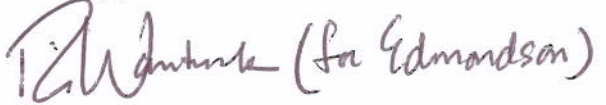

The document does not change our position with respect to Davis Hydro's proposal or the existing Early Decommissioning Agreement. NMFS remains committed to the Early Decommissioning Agreement previously signed along with PG&E, the California State Water Resources Control Board, the U.S. Fish and Wildlife Service, the California Department of Fish and Game, the National Park Service, Trout Unlimited, and Friends of the River - establishing a framework for a decommissioning and restoration scenario for this Project. This agreement remains the most viable alternative for maximizing benefits for anadromous fish.

NMFS has previously documented our concerns regarding Davis Hydro's proposal in a comment letter responsive to an earlier version of the Davis Hydro proposal. These comments were filed on the FERC record on October 1, 2007. Our concerns with the new version are the same.

NMFS appreciates the opportunity to participate in this license surrender process and to provide comments on this document. If you have any questions regarding these comments, please contact David White at (707) 575-6810.

Sincerely,

A handwritten signature in dark ink that reads "D White (for Edmondson)". The signature is written in a cursive style.

Steve Edmondson
Northern California Habitat Supervisor
