

6.23.09 From: Susan Bradfield General Delivery
El Granada CA 94014 Re: Kilarc/Cow Creek Hydro
FERC No. 606 Greetings

Our PG&E submitted the applications for de-commissioning/de-stroying our Kilarc/Cow Creek Power Stations. For over 100 years these stations have operated generating a small but economically viable energy. The destruction of these is so contrary to current needs and conditions. Our ratepayers we paid for their and now against our will we are being asked to expend 10.4 or now at \$14.5 million to eliminate these stations! Please consider our communities which have grown up with around these amenities the Kilarc forebay/reservoir.

Stewardship with Pacific Forestlands and Stewardship Council was chartered to assist PG&E in their bankruptcy settlement.

Why pay all is money to destroy something that several smaller utilities want to maintain for us?? A win-win! Please consider licensing Project suitable entity that will maintain the integrity of this land.

Handwritten note: "I hope PG&E is not taking any more money from us."
